Near UET Singh Pura, Lahore.

Objective

I am a passionate Full Stack Developer who enjoys building modern and scalable web applications. I have hands-on experience with technologies like React.js, Node.js, Express.js, MongoDB, PHP, and Laravel. I can create secure login systems, develop APIs, design responsive and user-friendly interfaces, and perform testing to ensure applications work smoothly and reliably. I like solving real-world problems and have experience working with real-time features, role-based access control, and third-party integrations. I focus on writing clean and efficient code that is easy to maintain. I am always willing to learn new technologies, improve my skills, and grow as a developer while contributing to meaningful projects.

Skills

- **Programming language:** JavaScript, PHP.
- **Front-End Development:** HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, Redux Toolkit.
- **Back-End Development:** Node.js, Express.js, PHP, Laravel, RESTful APIs, JWT Authentication, Web-Sockets.
- **Database Management:** MongoDB, MySQL.
- **Tools:** Git, GitHub, Gitlab, Postman, Eloquent ORM, Jira, SourceTree.
- **Other Skills:** WordPress, Elementor, SEO (On-Page & Off-Page), Manual Testing (QA).

Experience

- **Full Stack Developer (ASE)** *Dec 2025 – Present*
  1st 4 Connect Lahore, Pakistan
  - Currently working as a **Full Stack Developer**, working with **PHP and Laravel** to design, develop, and maintain web applications. Responsible for backend development, managing **tenant-based databases**, implementing application features, and ensuring system performance and scalability. Also involved in **manual testing**, including functional testing, bug identification, issue verification, and ensuring overall application quality and reliability.
- **JS Full Stack Developer Intern (MERN Stack)** *Jun 2025 – Dec 2025*
  SeeBiz Pvt Ltd Lahore, Pakistan
  - Gained hands-on experience in developing full-stack web applications using the **MERN Stack** (MongoDB, Express.js, React.js, Node.js). Built secure authentication features using **JWT** and **RESTful APIs**, improving user access control. Implemented **real-time communication** using **Socket.io** for enhanced user interaction. Improved skills in component-based architecture, responsive UI design, and collaborative development practices
- **JS Full Stack Developer Trainee (MERN Stack)** *Jul 2024 - Dec 2024*
  Alplaar Consulting Lahore, Pakistan
  - JS Full Stack Developer training completed through **NAVTTC**, specializing in the **MERN** Stack (**MongoDB, Express, React, Node.js**). Gaining expertise in building dynamic, responsive web applications and developing robust front-end and back-end solutions.

Education

- **BS Computer Science (BSCS)** *Oct 2020 - Oct 2024*
  Virtual University (VU) Lahore, Pakistan

Projects

- **Online Daycare Center**
  Tools: [HTML, CSS, Bootstrap, PHP] [GitHub]
  - Developed an **Online Daycare Center Management System** to streamline daycare operations, including child registration, parent management, staff management, and daycare activity tracking. Designed a user-friendly interface and implemented efficient data management to improve accessibility, organization, and overall daycare management.
- **Notes Saving Application**
  Tools: [Tailwind CSS and React JS] [GitHub]
  - Built a fully responsive note-taking app with **create**, **edit**, **update** & **delete** functionality. Designed a smooth and intuitive UI for quick note access and real-time updates using React state management. Ensured component reusability and clean code organization for scalability.

- **MERN Teacher / Student Portal**
  Tools: [React JS, CSS, Express JS, Node JS, MongoDB] [ ]
  - Developed Teacher and Student dashboards with **JWT**-based authentication and **role-based** access control, implementing full **CRUD** operations for user-specific data. Built reusable and modular front-end components to ensure scalability, maintainability, and a smooth user experience.

- **Social Media App**
  Tools: [React JS, CSS, Express JS, Node JS, MongoDB] [ ]
  - Developed a social media platform enabling users to **post**, **like** and **comment** in real-time using **Socket.io**. Integrated JWT authentication and protected APIs using Express middleware for security. Built **real-time** Likes and Comments capabilities improving user engagement. Designed a responsive UI and optimized WebSocket communication for better performance.

- **Connectify – Influencer & Brand Collaboration Platform**
  Tools: [React JS, CSS, Express JS, Node JS, MongoDB, Socket.io, Stripe] [ ]
  - Developed a scalable **MERN stack** web application for brand–influencer collaboration featuring **admin approval workflows, campaign creation, and category-based influencer targeting**, with **RESTful APIs, JWT-based authentication**, and **role-based** access control for secure access. Implemented offer **accept/reject logic, real-time chat and notifications using Socket.io/Web Sockets**, and **Stripe payment gateway integration** for secure campaign transactions, while designing a responsive React UI and optimizing **MongoDB data models, CRUD operations**, and backend performance to ensure scalability and high user engagement.

- **Fast HRM**
  Tools: [jQuery, Bootstrap, PHP and Laravel]
  - Developed and maintained a **Human Resource Management** (HRM) Portal using **PHP and Laravel**, working across multiple modules including **Leave Management**, **Attendance**, **Timesheets**, **Expense Claims, Employee Management**, and **other HR modules**. Developed and maintained APIs for the mobile application and web portal, managed **tenant-based** databases, implemented **role-based access** and **permissions**, and performed **manual testing** to identify, verify, and resolve functional issues. Contributed to debugging, feature enhancements, and maintaining overall application quality and reliability. Also worked with **GitLab** for version control, code management, and collaboration.
